

Our town Derecske and the sustainability

I live in Derecske. It is in north-east of Hungary, in Hajdú-Bihar County. It is a small town near Debrecen, which is the second largest city in Hungary. Derecske is 22km far from Debrecen. It is 20km far from Hajdúszoboszló.

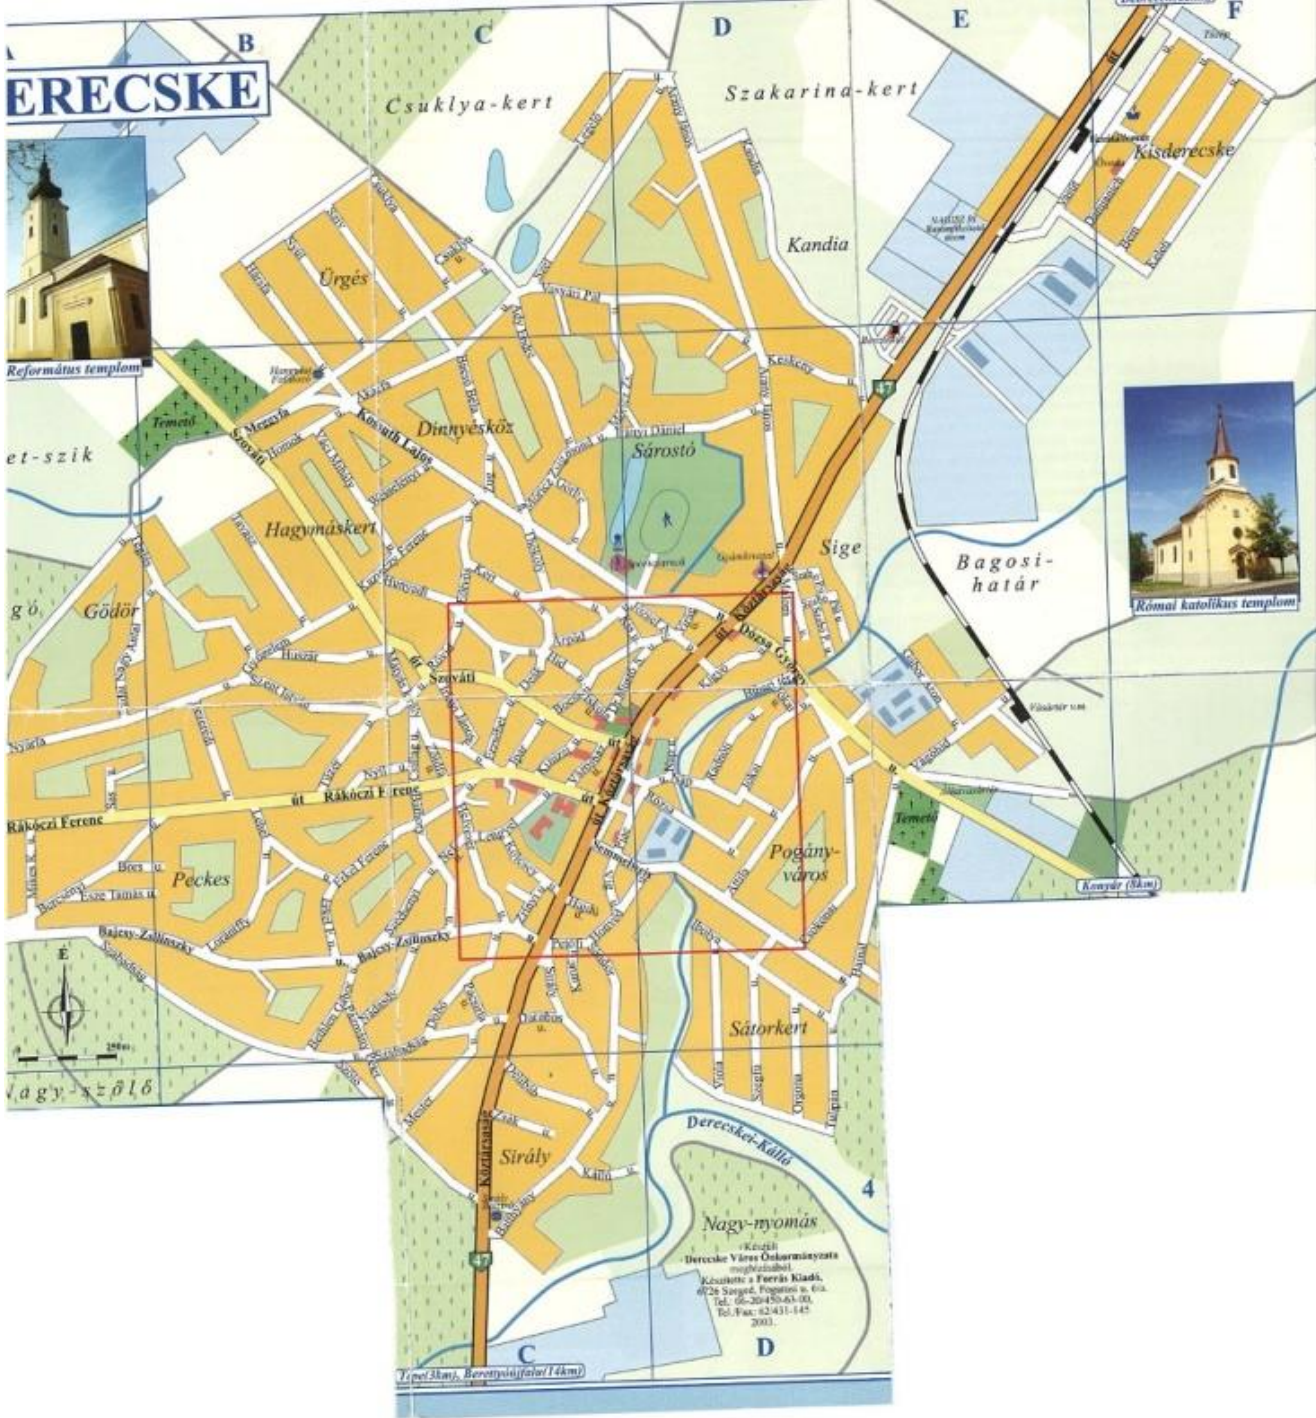

8400 people live in Derecske. There is a small river, called Kálló. There is a small forest near the town. Its name is Small Forest. There aren't any mountains and hills around Derecske. Interesting sights in the town: a swimming pool, a Fishing Lake, a Folk House. There are two churches: one of them is a Catholic and the other is a Reformed Church. There is a very nice park in the centre of our town. In the park you can find a monument of World War I and the monument of the World War II. The monument of the Hungarian Revolution and War of Independence of 1848-1849. There is a monument of Trianon. Buildings here: a swimming pool, churches, a town hall, a post office, a police station, a kindergarden, a library, a culture house. There are 2 supermarkets, and lots of small shops. There are 2 schools, a primary school and a secondary school. I study in the primary school. Every year, there is a week of sustainability in the week of April 22nd. Save the Earth...
